Based and crafted in Barcelona

Nomade opens up new ways to discover the world. Our camper vans combine design, innovation, and performance to create a unique mobility experience.

Handcrafted in Barcelona by a team of designers, engineers, and interior architects. Each vehicle is individually built to order using high-quality components from select suppliers. This is not mass production. It's your camper, tailor-made for you.

Relevant and general characteristics

01

Open floor plan

The kitchen is not separated, the bathroom does not interrupt the space, no walls block the way. Everything flows from the back door into the cabin.

02

Everything in its place

At Nomade, we don't improvise when it comes to storage space; we plan it meticulously. Every inch of living space has its purpose. The cupboards extend along the entire perimeter. Even with everything you need for weeks, the camper feels empty.

03

Autonomy

Electrical system with up to 540 Ah lithium battery. Operates independently of the power grid for weeks.

Up to **150 liters of clean water** for days of autonomy.

Gas-free: 100% electric heating and hot water. No restrictions on tunnel or ferry connections.

04

Interior Design

The heart of our campers is their modern and minimalist interior. Every detail counts: fabric coverings, stain-resistant upholstery, natural wood surfaces and atmospheric lighting.

05

Comfort

Kaiflex insulation, heating and air conditioning: your ideal temperature, everywhere.

06

Technology

Garmin display: Full control over battery, water and heating.

Starlink: Mobile office with comprehensive networking.

Onboard cinema: retractable screen, projector and premium sound system.

Our models

There's no single right way to travel. Some seek spontaneous getaways, others are on the road for weeks at a time. Our collection has been designed to meet all needs, offering a variety of layouts and capacities without losing sight of the essence of Nomade Nation: freedom, design, and functionality.

Neo

Everything you need for a trip for up to three people. Versatile, spacious, and ready for any plan.

Number of passengers: 3

Cabin access: No

Sleeping berths: 3

Size: L3H2

Layout: Fixed bed + living area

Neo S

The perfect camper for two people. An open, interconnected space designed for couples who wish to travel together.

Number of passengers: 2

Cabin access: Yes

Sleeping berths: 2

Size: L3H2

Layout: Fixed bed + seating area

Space

The most advanced Nomade experience.
More space, more technology and
exceptional comfort.

Number of passengers: 3

Cabin access: No

Sleeping berths: 4

Size: L3H2

Layout: Pop-up bed + rear seating area

Space S

Everything comes through the back door.
The space extends into the cabin, creating
an unparalleled sense of space.

Number of passengers: 2

Cabin access: Yes

Sleeping berths: 4

Size: L3H2

Layout: Pop-up bed + rear seating area

Nomade Neo and Neo S

A fully equipped kitchen.

86-liter compressor refrigerator with cooling compartment.

Two gas burners, optionally with induction hob.

Storage space with drawers featuring a soft-close function and a pull-out worktop.

Modern designer washbasin with permanently installed tap.

Equip your campervan kitchen with a microwave and a Nespresso coffee machine. This way you can enjoy the comforts of home wherever you are.

A restful night's sleep is part of the journey:

The Neo bedroom was designed to make you feel at home. It features a comfortable, firm double bed and plenty of storage space underneath, ideal for keeping everything tidy.

If the journey requires it, the bed can be set up between the benches in seconds, thus providing a comfortable third sleeping place without any complications.

Living room

Unfold the extendable dining table and create your ideal living and dining area in seconds. The perfect place to eat, work, relax, play, and unwind.

The comfort of home, even in your bathroom:

Relax under the warm water of a hot shower at a location of your choice anywhere in the world.

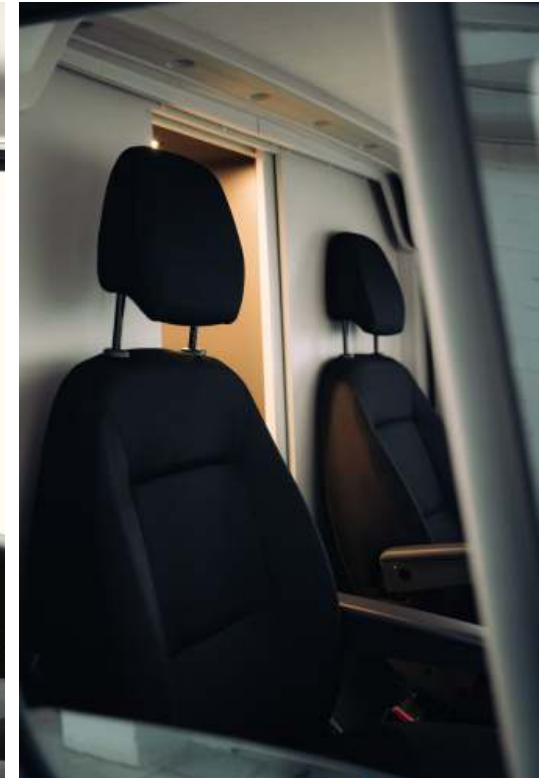

Enjoy a comfortable and hygienic bathroom wherever you go. Choose between two options depending on your travel preferences: Dometic chemical toilet or Clesana dry toilet.

Space for everything that goes with the adventure

Travel without compromise. Every compartment is designed to make optimal use of available space and keep everything within easy reach. From luggage and kitchen utensils to sports equipment and small everyday items – everything has its place.

A large trunk with access from both inside and outside makes loading and unloading incredibly easy. Overhead storage compartments, space for long items like skis, LED lighting, a charging station, and clever storage solutions for the outdoor shower ensure that every inch is used optimally.

One room for traveling,
another for living.

In the 3-seater configurations, the driver has a single seat and the front passenger has a double seat, completely separating the cabin and passenger compartment. In the S models, two single seats share a space with a sliding door: this opens when access to the cabin is needed and closes again to ensure complete privacy inside.

Nomade Space and Space S

Prepare your favorite meals on wheels.

The Space kitchen was designed for optimal cooking results anywhere. It combines complete equipment with optimal space and high functionality.

The 86-liter compressor refrigerator – expandable to 140 liters – keeps food fresh in any weather. Two gas hobs cover everyday needs; alternatively, an induction hob can be used for those who prefer to cook without gas. Storage space is provided by drawers with a soft-close mechanism and a pull-out work surface. The modern sink with a black pull-out faucet completes the overall look and blends harmoniously into the camper's design.

From here you can customize it: microwave, integrated Krups Nespresso coffee machine and thermoelectric wine cooler for 8 bottles.

Relax in nature, just as you've always dreamed.

A single touch of a button is all it takes to completely transform your living space. The electric lift bed provides a spacious living area during the day and a comfortable bedroom at night. The automatic lifting system, with a load capacity of up to 600 kg, can be stopped in any position to adjust the height and adapt the interior to your travel needs.

Lights, camera, action

The cinema package includes a retractable screen with multiple positions, a high-quality projector, and a premium sound system. Transform your room into a private home theater and enjoy your favorite movies and series in crystal-clear, brilliant picture quality.

Limitless versatility.

The perfect rear lounge area for dining, relaxing and enjoying the view, with a U-shaped layout that offers maximum comfort and a spacious feel inside.

It features a 360° rotating table and strategically placed power outlets to transform the living room into a true teleworking space.

A complete bathroom, no matter where you travel:

The luxury of your own bathroom, wherever you are. Space offers the solution: a completely waterproof bathroom with an indoor shower cubicle, equipped with a non-slip platform and a sliding door that separates the room without taking up space in the rest of the camper.

For the toilet, there are two options depending on how you travel: the Dometic cassette, the most common solution, or the Clesana dry toilet, designed for those seeking more autonomy and a more sustainable approach.

A wardrobe, a toilet paper holder and a towel rack complete the room, so that nothing is lacking in everyday life.

More living space. More freedom to travel.

The Space is ready for any adventure. Thanks to its multi-adjustable trunk and the storage compartments distributed throughout the interior under the seats, everything is always neatly stowed and within easy reach. Because when space is no longer an issue, all that's left is deciding on your next travel destination.
